

AGBU 450 Bachelor Degree Internship Program Student Learning Outcomes & Objectives and Activities

Internship Student Learning Outcomes AGBU 450:

- Students will develop the skills necessary to effectively communicate their thoughts and ideas in both written and oral form.
- Students will develop a high level of ethical and professional standards, thereby improving future employability.
- Students will utilize their understanding of business and industry to make sound business decisions that will allow them to function effectively in the global economy.
- Students will master the technical and practical skills necessary for day-to-day operations at the cooperating agricultural business.
- Students will understand the role that the cooperating entity plays within the larger context of the agricultural economy.
- Students will demonstrate self-direction and initiative in performing assigned duties.

Internship Objectives and Activities:

List objectives of the internship and specific activities to be completed. Indicate approximate amount of time to be devoted to each activity. Be as specific as possible. (The Faculty Supervisor will provide guidance in initial preparation of this section with input from the Site Supervisor. Please do not submit this document until everyone is in agreement to the details below.)
